EARLY HISTORY OF HONG KONG

The history of the Hong Kong community is really much longer than the history of the Colony itself. The Colony exists as an emporium for foreign trade with South China, and was founded in 1841, when the firms that had previously found a more or less insecure foothold in Macao or Canton began to migrate to the island where they could carry on their business under conditions of their own making, and under the protection of the British fleet.

It was in the early years of the 17th century that the Honourable East India Company first began to take an interest in Far Eastern trade. Japan had not then closed its ports to foreigners, and it was at Firando in Japan that the Company established its first factory; others followed at Tywan in Formosa, and then at Amoy. At that time any trade done with Southern China was done through the Portuguese merchants of Macao. The Ming Dynasty, which was then nearing the end of its long reign, was favourable to foreign trade, and an attempt was made to establish a branch of the Honourable Company at Macao. The difficulty that arose was not from the Chinese but from the merchants of Macao, who were reluctant to admit a competitor that might become too powerful. As a matter of fact the history of the Company's two centuries of trading under all sorts of restrictions, some of them distinctly undignified, showed none of the masterful diplomacy which distinguished the policy of the Board of Directors in India, and from 1625 to 1834 trade was carried on in spite of restrictions and exactions which gradually became systematised into a monopoly on the Chinese side which was as exclusive as the Company's own.

The cancellation of the Company's Charter was one of the many results of the Reform Act which threw open Parliament to the classes that were rising to power and wealth through the Industrial Revolution, represented by merchants whose interests and prejudices were all in favour of the most complete free trade procurable, and it was not long before the "interlopers," who had found means to do a considerable amount of business under the old system, began to demand a base of operations where they would not be subject to the whims of officials whose sole object was either to hamper their operation or to extract profit from them.

From the very first the island of Hong Kong, which was eventually chosen, and which had at that time not even a name, was developed on a basis of free trade and equal opportunities for all, and the tradition has lasted down to the present time.

At first the intention of the Home Government was to make the Governor of Hong Kong their representative for all purposes in the conduct of diplomacy and business with China and the Far East; but the system was found to work unsatisfactorily, and, after some thirty years, the functions of local Government were separated from those of wider policy, and an Embassy was established at Peking.

The growth of trade made it necessary to acquire a larger strip of land on the Kowloon side of the harbour, and some two square miles, including an island in the harbour called "Stonecutters," were leased in perpetuity. The island is now reserved purely for military purposes, but the added territory is to-day a busy dock area and thickly populated.

THE COLONY OF HONG KONG

Prior to 1841 there was no recognised name for the island of Hong Kong. The anchorage at Aberdeen was known to sailors as Heung Kong. The Chinese characters representing the name may be translated by "Fragrant Streams" or "Fragrant Harbour." Another possible rendering is "Heung's Harbour," the

haunt of a notorious character named Heung.

Kowloon is the anglicised form of the Chinese Kau Lung (nine dragons). This name is derived from the ridge of nine hills which form a rampart along the northern side of the harbour and seem to guard the approach to China.

Hong Kong became a British Colony in 1841. In 1860 about two square miles of the mainland of Kowloon and Stonecutters' Island were leased in perpetuity. The district called the "New Territory" was leased to Great Britain in 1898 for a period of 99 years. It covers 270 square miles and include Lan Tao Island and the waters of the farther shores of Deep Bay and Mirs Bay.

A book entitled "China" published in 1847, contains a chapter with the following heading: "Hong Kong, its position, prospects, character and utter worthlessness from every point of view to English." To-day one laughs at that prophecy. However when it was written there seemed to be reason for such a gloomy forboding for the place had an unenviable reputation for rain-storms, typhoons, pirates, poisoners, malaria, dysentery, etc., and in England contempt for the new colony was expressed in the then popular song, "You may go to Hong Kong for me."

To-day this formerly despised possession is one of world's busiest ports, and for an eastern city is remarkably clean, peaceable and healthy. As one writer remarks: "Hong Kong is a splendid example of what can be accomplished with the courage and restraint that go hand-in-hand with British colonisation. Over 100 years of patient administration by 23 Governors and 12 Administrators have brought Hong Kong into the front rank of the world's commerce. This happy achievement is due in no small measure to the harmonious working of two such different peoples as the British and the Chinese."

Hong Kong Airport, Kai Tak, is situated on the north shore of Kowloon Bay and is some 4 miles from the centre of Kowloon. Regular and frequent services, operated by 13 Airlines, link up Europe, U.S.A., Canada, Australia and neighbouring territories, with the exception of the China Mainland. The Colony is an important link on the main air routes of the Far East. B.O.A.C. operates a 5-times-a-week service to London, two of which go on the longer route via Singapore; the total journey on the direct route takes about 45 hours. The topography makes night flying hazardous and is not normally attempted. Full facilities for aircraft and passengers are provided

from dawn to dusk. The flying boat base adjacent to the Airfield provides moorings for these aircraft.

The chief industries are the building and repairing of ships and the making of rope, cement, glass, cigarettes, cigars, matches, paper, woollen, enamel and textile.

The best time to visit Hong Kong is during the winter months, when British conditions are enjoyed. Between March and May the weather is apt to be changeable and clammy, and from May till the end of September it is too hot and humid to be comfortable. The shade temperature ranges from 50 degree F. in January and February to 90 degree F. in the Summer months, and greater extremes are known. The average shade temperature for the year is slightly over 70 degree F. Geologically, Hong Kong cannot be declared interesting, but it holds great attractions for the botanist and the entomologist. Its scenery is superb and there are few prettier drives than the one round the island or that on the mainland from Kowloon to Tai Po or Kowloon to Castle Peak. There are also glorious rambles to be had in winter on the island and in the mainland hills.

Few places can show such a variety of games and recreations. Golf, tennis and yachting are indulged in all the year round; football (Rugby and Association), cricket and hockey are played in the Winter months; and during Summer lawn bowls, lawn tennis, baseball and perfect bathing are enjoyed. The Jockey Club hold a three-day Annual Meeting every February in addition to the many other race meetings throughout the year.

In Hong Kong East meets West. The latest from London, Paris and New York can be found cheek by jow! with all the alluring work of the Orient. If one wishes to travel in town one may do so by motor-car, taxi, bus, tram, rickshaw or sedan chair, while on the harbour motorboats, ferries, launches and sampans are at one's disposal.

The water is pure, the food good and plentiful and hotel and boarding-house accommodation first class. Hong Kong boasts a University, secondary and primary schools, numerous places of worship, up-to-date hospitals, modern cinema houses, and the finest golf course (at Fan-ling, in the New Territories) in the Far East.

Administration

The Government of Hong Kong derives its constitutional authority from Letters Patent and Royal Instructions issued from time to time and is administered by a Governor assisted by an Executive Council and a Legislative Council. The Executive Council, which is consulted by the Governor on all important administrative matters, includes the senior Military Officer, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Financial Secretary (who are members *ex-officio*), and such other members, both official and unofficial, as may be appointed. At the end of 1953 there were six official members (including the five *ex-officio* members mentioned above) and six unofficial members, three of whom were Chinese and one Portuguese.

The Legislative Council consists of the Governor as President, not more than nine official members and not more than eight unofficial members. At the end of 1953 there were nine official members, namely the five *ex-officio* members mentioned above, the Director of Education, the Director of Urban Services, the Director of Public Works and the Director of Medical & Health Services; and eight unofficial members, of whom one is nominated by the Chamber of Commerce and one by the Justices of the Peace. The remaining six, of whom four are Chinese and one Portuguese, are nominated by the Governor. The procedure of this Council, with the advice and consent of which all legislation is enacted and by which all expenditure from public funds has to be approved, is based on that of the House of Commons.

LOCAL STORM SIGNAL CODE.

(As approved at the Conference on Storm Warning Procedures held in Manila, May, 1949, for use in Hong Kong as from 1st January, 1950).

	NUMBER	DAY SIGNAL	NIGHT SIGNAL	MEANING
STANDBY	1		White White White	A depression or typhoon exists which may affect the locality
GALE	5	+ 	White Green Green	Gale (wind speed 34 knots and upwards) expected from the NW quadrant.
	6	+ 	Green White White	Gale (wind speed 34 knots and upwards) expected from the SW quadrant.
	7	+ 	Green Green White	Gale (wind speed 34 knots and upwards) expected from the NE quadrant.
	8	+ 	White White Green	Gale (wind speed 34 knots and upwards) expected from the SE quadrant.
INCREASING GALE	9		Green Green Green	Gale expected to increase.
TYPHOON	10	+ 	Red Green Red	Hurricane or typhoon wind (speed 64 knots and upwards) any direction.

STRONG WIND SIGNAL

+ 	White Green White	Strong wind (speed 22-33 knots).
---	-------------------------	----------------------------------

SIGNALS USED AT SUPPLEMENTARY STATIONS.

+ 	Green Green	Strong wind (speed 22-33 knots).
Red 	Red Green	No. 1 hoisted in Hong Kong harbour.
Red 	Red Red	Nos. 5, 6, 7, 8, 9 or 10 hoisted in Hong Kong harbour.

+ International signals.

EXPLANATORY NOTES.

Signal No. 1 is a cautionary or "stand by" signal, and does not necessarily imply bad weather.

Signals Nos. 5 to 8 convey definite warning of expected gales from different directions. A "gale" is equivalent to a mean wind velocity of 34-40 knots, but gusts may reach 60 knots. These four signals are therefore of equal significance as regards wind velocity, but are for different wind directions.

Signal No. 9 will not necessarily be used if conditions warrant the hoisting of No. 10 as soon as it is evident that the gale will increase.

Signals will be lowered when danger is considered to be over.

The Black Ball (strong wind warning signal) is primarily intended to warn small craft of the onset of strong winds which are not expected to reach gale force. It may be hoisted to give warning of strong monsoon winds in winter, or of winds due to tropical depressions of small intensity.

THE CHINA SEAS NON-LOCAL STORM SIGNAL CODE FOR VISUAL STORM WARNINGS

(As amended by agreement between the Meteorological Service of Indo-China, the Central Weather Bureau of China, and the Royal Observatory, Hong Kong, and used from 1st January, 1950).

1. The following ten symbols are used:—

indicating the figures

1 2 3 4 5 6 7 8 9 0

2. These signals are hoisted at the mast head and at the yard-arms of a storm signal mast, and have the following significance:—

- (a) 1 symbol at the mast head showing the time at which the centre of a tropical cyclone was in the position indicated (Table I).
- (b) 4 symbols at one yard-arm showing the position of the centre. The two upper symbols give by their corresponding numbers the latitude in degrees; the two lower symbols the longitude in degrees (initial 1 omitted for longitudes of 100° or over).
- (c) 3 symbols at the other yard-arm. The two upper symbols of this group show the speed and direction of motion of the centre at the time of observation, or, alternatively, certain conditions (Table II).

The lowest symbol of this group shows the intensity of the cyclone, together with the degree of accuracy with which the centre has been located (Table III). The latter is specified as the radius of the circle whose centre is shown by the latitude and longitude. Thus the position indicated by the latitude and longitude signals does not purport to be the exact position of the storm centre, but merely the centre of a circle of specified radius within which the centre of the storm is believed to lie.

HONGKONG'S FUNICULAR RAILWAY

(THE PEAK TRAMWAYS)

TAKES ONE **1,400** FEET ABOVE SEA-LEVEL

IN

EIGHT MINUTES

TO VIEW

*The Most Wonderful
Panorama in the World*

FAST—SAFE—UNIQUE—CHEAP

Operated since 1888, the Peak Trams offer one of the safest ways of travelling. The trams are fitted with independent wire cables, and are controlled by an electrical haulage equipment at the Upper Terminus. This equipment is operated by an engineer who can see from a track indicator exactly where the trams are at any time.

In the course of the journey the brakesman communicates with the Engine Room by a system of signals, and the Engineer moves the trams as required by the brakesman. In the event of an extreme urgency, it is only necessary for the brakesman to release his hold of the Safety Brake Bar and this action automatically closes two powerful jaws, which are fitted at each end of the chassis, onto the centre track rail which is fastened firmly to the track bed. This powerful braking system will stop the tram within eight feet on the steepest gradient of the track.

ABRIDGED RULES

1. ORDINARY TELEGRAMS

Rates as shown subject to a minimum charge as for 5 words.

The text of an ordinary telegram may be written in Plain Language or in Secret Language or in a mixture of both.

PLAIN LANGUAGE Telegrams written entirely in plain language are counted at the rate of 15 letters to the word. Commercial marks, exchange quotations etc., are counted at the rate of 5 characters to the word.

SECRET LANGUAGE Telegrams written entirely in secret language are counted at the rate of 5 letters or characters to the word.

MIXED LANGUAGE Telegrams written in a mixture of Plain and Secret languages are governed by the rules of counting for Plain and Secret language above.

2. URGENT TELEGRAMS

Priority of transmission and of delivery may be obtained to places where urgent telegrams are admitted by writing before the address the paid service instruction "Urgent", which is counted and charged for as one word. The rate for urgent telegrams is double ordinary rate.

3. LETTER TELEGRAMS

Rates as shown subject to a minimum charge as for 22 words. The text of a letter telegram must be written in Plain language. Letter telegrams must bear before the address the paid service instruction "LT" which is counted and charged for as one word. The delivery of letter telegrams shall take place after 08.00 o'clock local time, on the morning after the date of deposit.

4. SOCIAL TELEGRAMS (Admitted within the British Commonwealth only).

Rates as shown subject to a minimum charge as for 10 words.

The text of a social telegram must be written in Plain Language and be of a social nature.

Social telegrams must bear before the address the service instruction "GLT" which is not charged for but is counted as one word in the number of words shown in the preamble.

Social telegrams may be addressed to a registered address.

5. PRESS TELEGRAMS

Rates and conditions on application.

6. RADIOTELEGRAMS (Indirect Service).

Telegrams exchanged with ships at sea through Radiotelegraph Coast Stations are subject to the normal telegraph charges to the country in which the coast station is situated, increased by the respective coast and ship charges for the radio transmission. Letter Telegrams are not admitted.

7. PREPAID REPLIES

The sender of a telegram may prepay a reply from his correspondent in those countries which admit this facility by writing before the address the paid service instruction "Reply Paid" or "RP" followed by the amount prepaid for the reply. This instruction "RPx" is counted and charged for as one word.

A reply paid voucher is valid for a period of three months from the date of issue to any destination.

8. REPEATED OR COLLATED TELEGRAMS

Repetition of a telegram may be obtained on payment of an additional charge equal to one-half of the full ordinary rate to the same destination and by inserting before the address the paid service instruction "TC" which is counted and charged for as one word.

DEFINITION OF PLAIN LANGUAGE

1. Plain language is that which presents an intelligible meaning in one or more of the languages admitted for international telegraph correspondence, each word and each expression having the meaning normally assigned to it in the language to which it belongs.

2. By telegrams in plain language are meant those of which the text is wholly in plain language. The character of a telegram in plain language is not changed by the presence of:—

- (a) Numbers written in letters or figures, groups composed either of letters or of figures provided that these numbers and groups have no secret meaning;
- (b) Arbitrary or abbreviated addresses;
- (c) Commercial marks, trade marks, reference numbers or indications and expressions provided they are shown in a catalogue or price list available to the public or shown in a bill of lading or similar document;
- (d) Abbreviated expressions in current use in ordinary or commercial correspondence, such as fob, cif, svp or any similar expression;
- (e) A single check word or check number placed at the beginning of the text and not exceeding five letters or five figures in length.

3. Languages admitted in plain language telegrams are those used in the country of origin and of destination. Additionally, most modern languages are also admitted. The text of telegrams originating in or destined for China may be expressed wholly by means of groups of four figures taken from the official telegraph dictionary of the Chinese Administration.

DEFINITION OF SECRET LANGUAGE

Secret Language is formed of:—

a. Artificial words composed exclusively of letters; such words must not exceed five letters in length;

b. Real words not used with the meaning normally assigned to them in the language to which they belong and consequently not forming intelligible phrases in one or more of the languages admitted for telegraph correspondence in plain language;

c. Arabic figures, groups or series of Arabic figures having a secret meaning;

d. Words, names, expressions or combinations of letters not fulfilling the conditions laid down for plain language.

e. A mixture of words and expressions mentioned in a. b. c. and d.

ENQUIRIES

All enquiries regarding received or transmitted telegrams must be accompanied by the telegram itself or by the receipt for the transmitted telegram and should be made at one or other of the Company's counters or at the office of the Traffic Agent.

GENERAL POST OFFICE OVERSEAS AIR MAIL SERVICES

GENERAL INFORMATION:

In general the limits of weight and dimensions and other conditions (but not postage rates) prescribed for surface mails apply also to articles intended to be sent by air. The rates, which include postage and air fees, are shown in the tables below.

AIR LETTERS:

Air letter forms impressed with 40 cts. stamps and air mail markings are sold at all post offices. Air letters manufactured by private individuals and concerns and approved by the Postmaster General are accepted for posting after 40 cts. in postage has been affixed. Air letters may not be tendered for registration.

AIR PARCELS:

The general regulations applicable to surface parcels as regards weight limitations, customs declarations, despatch notes, compensation, etc., apply also to air parcels. Insured parcels are not accepted. The blue airmail label must be affixed to the address side of the parcel and to the despatch note if the country of destination requires it.

SECOND CLASS MATTER:

Printed papers, samples, small packets, etc., sent by air must conform to the regulations for such articles, and must be clearly superscribed in the upper left-hand corner of the cover for the particular service intended, namely, "printed matter", "sample", as the case may be. Where there is no specially reduced rate for such articles, they must be prepaid at letter rate.

EVERYTHING
ELECTRICAL**

Every minute of every day someone, somewhere, needs G.E.C. electrical equipment. Huge turbo-alternators are shipped to Brazil, the latest radio sets to South Africa, an electric arc-welding set is sent to Glasgow, and a consignment of switches to Southampton. Everything which is operated by electricity or for the generation of electric power, can be obtained from the G.E.C.—the largest British electrical manufacturing organization.

ALKA needs no introduction, because . . .

- . . . in SWEDEN (a small country of 7 million inhabitants) 2,000 million ALKA-caps were used last year. This corresponds to 1,500 tons of aluminium, and it means that 63 caps were torn off per second, night and day, the whole year through.
- . . . in AUSTRIA, a beer-drinking nation, sixty percent of all beer is brought on the market in ALKA-sealed bottles.
- . . . in ENGLAND one client alone, the Express Dairy Company of London, has now bought 80 big fully automatic ALKA-machines.

The History of the ALKA-cap

Since, in 1760, the first large scale cork stopper factory was started at Gerona in Spain, inventive genius throughout the world has been trying to construct the perfect bottle closure.—In 1852 an American, William Payntor of Baltimore, invented the type of lacquered tinned sheet-iron bottle closure which is still to be found on most bottles in Hong Kong.—However, it frequently rusts, particularly in our humid climate. Furthermore, its creased, partly protruding edge collects dirt that may fall in the bottle or in the glass. Finally, it cannot be opened without a tool, nor is it entirely tamper-proof.

These disadvantages lead to the invention (in 1914) and subsequent success of the ALKA-cap which is now being introduced for the first time in Hong Kong. Today, forty years after its invention, the ALKA-cap has captured the world market; and the ALKA factory is now represented in approximately fifty countries in five continents by associated companies and representatives.

The ALKA-caps are made of pure (99.7%) aluminium which is universally accepted as the most practical and hygienic material. It does not rust, is impervious to most chemicals and has a neat appearance. The frilled tear-off tag enables even a child to remove the ALKA-cap by a simple movement of the hand, without employing any tool. Furthermore, the ALKA-cap fits tightly around the bottle mouth, leaving absolutely no hiding places for dirt, and the pouring

lip is just as clean, when the bottle is opened as when it was filled. Finally, the ALKA-cap guarantees the public untampered bottle contents, because the cap cannot be removed without being torn; and a cap which has been torn cannot be replaced.

Bottlers using ALKA make a substantial saving, because the ALKA-machines not only seal the cap on the bottle; they also draw the cap from an aluminium strip (plain, coloured or decorated), form it into the required shape, insert a cork disc with or without a "spot", and provide the caps with embossing—all in one continuous, fully automatic operation.

The ALKA-caps can be used for all kinds of bottles and beverages such as beer, milk, mineral water, lemonades, oil, cosmetics, perfumes, medicines etc.

ALKA . . .

*The Tear-off Cap! No chipped bottle necks!
Tamper-proof! No rust!
No openers required! Hygienic!*

LONGINES

The World's Most Honoured WATCH

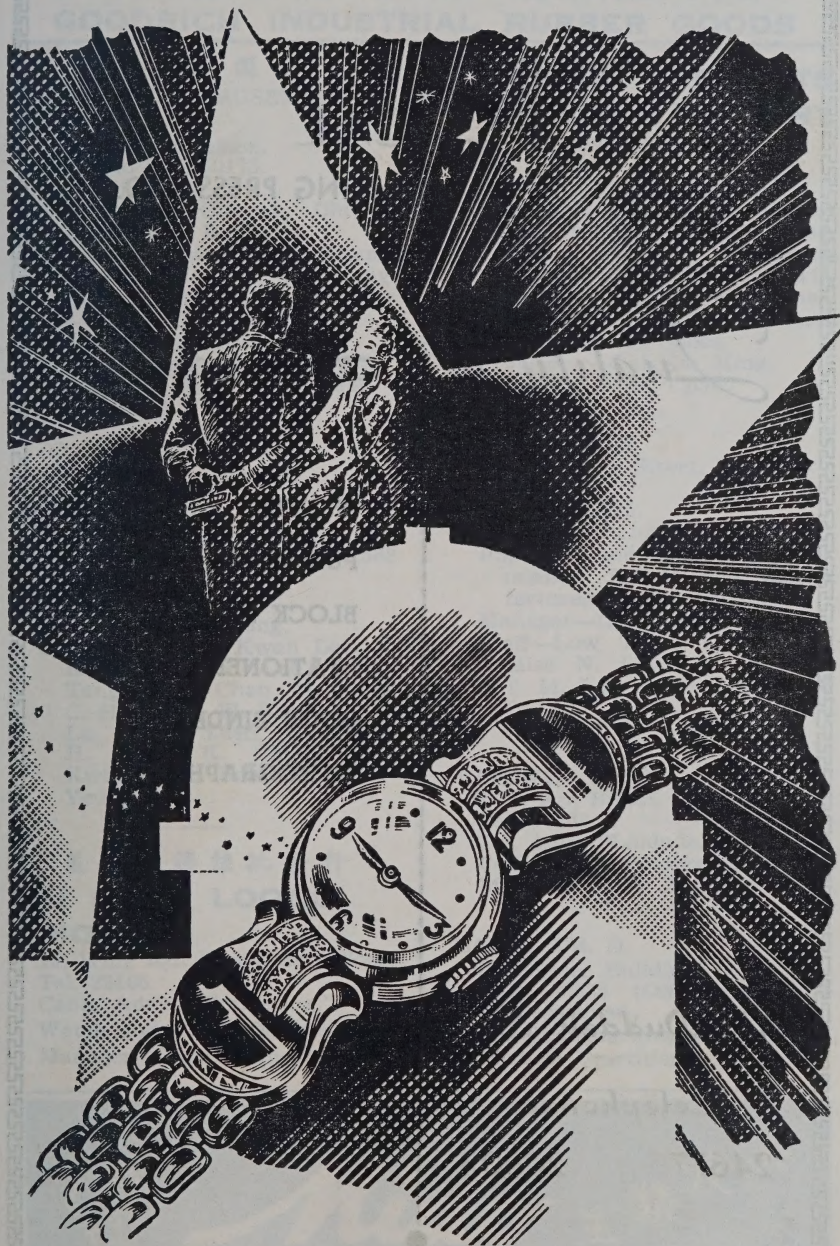

Leaders in every walk of life, in 77 countries throughout the world are proud owners of Longines, the world's most honoured watch. Longines watches have won more world's fair prizes, gold medals, and more honours for accuracy than any other timepiece. Longines watches combine all the qualities one demands in a fine watch—prestige, accuracy, long life, technical superiority and elegance.

An Independent School Co-Educational all Nationalities.

Ages: From 5 years old to 19 years old. All Classes, from Kindergarten to Matriculation.

The Dalton Plan is used in the Senior Classes, work being based on three-weekly assignments in all subjects. This plan develops a pupil's own initiative in apportioning his time to the best advantage. He is taught how to study.

Classes are small, averaging about 15 per teacher, so that the best students are not held back at the pace of the average.

Visitors are always welcome.
